Registration and Hotel Reservation

The Invitation Programme will be available from October 2004 on. It will contain detailed information about registration and hotel reservation as well as the registration form. For the latest information on the congress please see **www.etes2005.org**.

Social Programme

On the first congress evening, August 31st, right after the end of the sessions all participants are invited to the Welcome Reception in the area of the industrial exhibition. On Friday night, September 2nd, we will celebrate the **"ETES-Oktoberfest"** – a Bavarian Evening with traditional food and entertainment in a relaxed atmosphere.

Industry Participation

An industry exhibition will be held in the foyers of the Auditorium Section. There will also be other possibilities for the industry to take actively part in the congress (e.g. Satellite Symposium, advertisements in the printed congress programmes, sponsoring of the congress bag etc.).

Please contact EUROKONGRESS for information and registration.

Call for Abstracts

The Call for Abstract will be part of the Invitation Programme.

H&C, Heye

Welcome to Munich

Dear colleagues and friends,

For me and my colleagues from the organizing and scientific committee it is an honour and great pleasure to invite you to the 4th Annual Meeting of the **European Tissue Engineering Society (ETES)** in Munich, Germany in 2005.

Traditionally it has been the intention of physicians and scientists for many decades to replace injured, diseased or worn out body parts with newly designed and "custom (patient)-tailored" functional tissues and organs for an individualized and patient-centred therapy. *TISSUE ENGINEERING* is still one of the key elements in the expanding field of regenerative medicine, bringing together the traditional research in biomaterials and scaffold with areas like stem cells and genetic research, all for the benefit of the patient.

Like in the field of *TISSUE ENGINEERING*, Munich blends together old traditions and virtues with modern innovative technologies to create a successful harmony for the benefit of the community and an inspiring environment for research, technology and science. Munich is the capital of the State of Bavaria and is located close to the scenic Alps, surrounded by many lakes and recreational areas. The city hosts two outstanding universities with a long history of achievements in the field of life sciences, technology and engineering. Many successful biotechnology enterprises reside in the immediate vicinity of the city and employ many graduates from both universities.

But Bavaria is also particular famous for its cultural habits and its beer brewery tradition. Two weeks before the start of the original and world-famous beer fair, we will celebrate our own **ETES-Oktoberfest**.

Please come and join us in Munich for an outstanding scientific meeting in the field of Tissue Engineering and Regenerative Medicine. We will pay particular attention to the work of young scientists, who will be given an opportunity to present their research and discuss their results. We also heartily welcome scientists from the new EU member and candidates states and hope to bring together scientists and clinicians from all over, who are interested in this fast developing field in biomedical research and life sciences.

Welcome to Munich.
R. Huss

Ralf Huss
Congress Chairman

Organizer

European Tissue Engineering Society (ETES)
President: Jöns Hilborn, Uppsala (Sweden)

Congress Venue

Ludwig-Maximilians-University
Klinikum Grosshadern
Auditorium Section
Marchioninistrasse 15
D-81377 Munich

Congress Dates

Wednesday, August 31st, 2005 (approx. 12.00h) until
Saturday, September 3rd, 2005 (approx. 13.00h)

Regional Scientific Committee

Joachim Aigner, Munich
Augustinus Bader, Leipzig
Dietrich Birnbaum, Regensburg
Jochen Eulert, Würzburg
Achim Göpferich, Regensburg
Burkhard Hennemann, Regensburg
Karl-Walter Jauch, Munich
Marianne Jochum, Munich
Will Minuth, Regensburg
Wolf Mutschler, Munich
Ulrich Noeth, Würzburg
Stephan Rapp, Munich
Wiltrud Richter, Heidelberg
Axel Stemberger, Munich
Wolfgang Thasler, Munich
Erich Wintermantel, Munich
Günther Ziegler, Bayreuth

Topics (Selection)

- Applied Tissue Engineering
- Stem cells and Cellular Therapy
- Scaffolds and Bioreactor Technology
- In vitro surrogates and Organ Imprinting
- Cardiovascular and Angiogenesis
- Muscle, Ligaments and Tendon
- Bone and Cartilage
- Kidney and Genitourinary System
- Liver and Pancreas
- Central/Peripheral Nervous System
- Microcirculation and Graft Survival
- Tissue Engineering in Reconstructive Surgery
- Quality Management, Safety and Standards
- Regulatory Affairs and Legal Requirements
- Entrepreneurship in Tissue Engineering
